HVDT, LEFT:	37	108			

The following list contains specific occupations that have been selected on the basis of the individual's verbal-spatial-cognitive, sensory and motor factor scores. (Emotional and integration-coping data are reported for your information only and were not used in the present selection procedure.) This individual's factor scores meet or exceed the minimum requirements on the occupations listed below. The selected occupations have been grouped under their respective Worker Trait Group or Occupational Aptitude Profile.

NOTE: IF NO JOBS ARE PRINTED, the verbal-spatial-cognitive, sensory, fine motor and/or gross motor scores entered failed to meet the minimum requirements (std. scores of 70 and above) for occupations in the OES job file. Job listings, in most instances, are generated only for individuals functioning at the Transitional level of employment and above.

This report is based on data derived from the McCarron-Dial System and other sources.
